PROFILE

Severo Ochoa postdoc at ICMAT-CSIC Madrid pivoting into technical AI safety or governance. PhD in mathematical physics: main research in differential geometry and integrable systems, substantial coursework and a paper in functional analysis and spectral theory. 10 peer-reviewed articles.

AI SAFETY

Public writing: [ARC's research agenda: solid mathematics, an unclear safety case](#) (Jul 2026), first in a series on AI-safety orgs for mathematicians moving into the field; and [AI in Mathematics, 2026: From Assistant to Top Researcher](#) (Aug 2026).

Volunteer, PauseAI CZ, z. s. (2026–present). Author of the Czech-language weekly newsletter [Pozastavení nad AI](#), synthesizing frontier-AI developments and their EU and Czech policy implications for a non-specialist audience.

AGI Strategy course, BlueDot Impact (Jul 2026), certificate. Final project on compute-governance verification through hardware-enabled mechanisms.

Independent study of formal impossibility results in AI control (Alfonseca et al. on containment, Yampolskiy on controllability).

Giving What We Can 10% Pledge. Committed to donating 10% of lifetime income to effective charities.

EMPLOYMENT

Dec 2024 – Nov 2026 **Postdoc (Severo Ochoa)**, Instituto de Ciencias Matemáticas (ICMAT), CSIC, Madrid. Haantjes algebras for separation of variables of (super)integrable systems. **Supervisor:** P. Tempesta

Sep 2024 – Nov 2024 **Research Associate (part-time)**, FNSPE, Czech Technical University in Prague

2021 – 2024 **Assistant lecturer**, Dept. of Physics, FNSPE CTU. Seminars in Theoretical Physics 2, Lie Algebras and Groups, and Geometrical Methods in Physics.

EDUCATION

2020 – 2024 **Ph. D.**, FNSPE CTU Prague, Mathematical Engineering / Mathematical Physics. **Thesis:** *Integrability and superintegrability in the presence of magnetic fields: separable and nonseparable systems*. **Supervisor:** L. Šnobl; **Co-supervisor:** A. Marchesiello. *Rector's Award for Excellent Doctoral Thesis (2025)*. **Grade:** 1.00 GPA (Excellent); oral defence Grade 1.

2018 – 2020 **Master's Degree with Honors (Ing.)**, FNSPE CTU, Mathematical Physics. **Supervisor:** L. Šnobl; **Consultant:** P. Winternitz. **Grade:** A (GPA 1.31).

2015 – 2018 **Bachelor's Degree with Honors**, FNSPE CTU. **Grade:** A (GPA 1.41).

RESEARCH VISITS

ERASMUS+ research exchanges: Universidad Complutense de Madrid, Spring 2023 (P. Tempesta); Université de Montréal, Fall 2019 (P. Winternitz).

AWARDS

Rector's Award for Excellent Doctoral Thesis, CTU (2025); **Josef Hlávka Award** for the best students and graduates of public universities in Prague (2023); **Milan Odehnal Award** (2024), honorable mention, Czech Physical Society; **Dean's Award** for the 2nd best Master Thesis (2021).

SKILLS

Software: Maple, $\text{\LaTeX}$; author of an open Maple package for computing Nijenhuis/Haantjes torsion, github.com/OndrejKubu/NijenhuisHaantjesTorsion (2026). Basics of C++; daily use of AI coding assistants in research.

Coursework: Doctoral courses, all graded 1 (excellent): Schrödinger operators; geometrical aspects of spectral theory; operator semigroups; classification and identification of Lie algebras; solvable models of mathematical physics.

Service: 4 peer reviews for *Journal of Physics A*.

Languages: Czech (native), English (C1–C2), German (B2/C1), French (B2), Spanish (A2).
